ENGLISH FOR ART AND DESIGN

Art and design are areas that are rapidly becoming more international and offer many more collaborative opportunities around the world. Our **English for Art and Design** programme has been designed for creative learners that want to develop their language skills to succeed in higher education or employment linked to the art and design industry.

This course will help you to gain a greater understanding of key concepts and language connected to art and design to help you communicate in the industry or support your studies in art and design.

Learning outcomes

- Recall useful education terms related to the topic of art and design;
- Match graphics to key objects that you might encounter in the world of art and design;
- Critically evaluate your own work and the work of others;
- Use functional language to discuss your work and demonstrate originality;
- Ask and answer questions relating to the topic of art and design;
- Demonstrate an understanding of the cultural context in which works of art and design were created.

ENGLISH FOR AVIATION

Effective communication is essential in the aviation industry. Developing your English language skills around topics related to aviation can help you to communicate clearly in the workplace, create a safe working environment, and improve your future job prospects.

On this **English for Aviation** course, you will develop your vocabulary and core skills around topics related to aviation.

Topics

You will study general topics such as:

- Understanding airport markings and signs;
- Asking for and giving information;
- Communicating problems and providing solutions;
- Recalling useful abbreviations;
- Expressing information clearly;
- Identifying common communication errors.

Additional topics

If you are interested in a career in aircraft engineering, you can opt to take additional units to develop your knowledge and understanding of:

- Aircraft engineering principles;
- Engineering environmental awareness;
- Engineering mathematics;
- Engineering science;
- Engineering projects.

ENGLISH FOR BUSINESS

This **English for Business course** is for students and business people who want to improve their communication skills using the language of business. You will gain confidence using functional language to succeed in a wide range of business scenarios. You will also broaden your business vocabulary, improve your fluency in real-life business situations, and improve your future career prospects.

Learning outcomes

- Learn and use words and phrases that will help you communicate in the world of business;
- Read and understand a wide range of business texts;
- Listen to and comprehend authentic recordings from business contexts;
- Review grammar points that will improve your spoken and written accuracy;
